

Theme 029 for Prestashop

Designed by template-help - www.template-help.com

Created on Prestashop v. 1.3.1

Installation

- Having the package downloaded, extract the contents of the **theme** folder to your Prestashop installation root directory.
- Patch your prestashop database with the provided source/dump.sql (**only if you want sample contents**) **Warning! Patching the database with our sql dump will remove your data, so please back it up before patching.**
- Log into Prestashop administration panel, go to *Preferences* → *Appearance* and select your theme in the *Themes* tab.

Settings of modules as on our livedemo preview

Go to the *Modules* → *Positions* and set up modules as on our demo preview:

Module name	Position	Order
Currency block v0.1	Top of pages	1
Language block v0.1	Top of pages	2
User info block v0.1	Top of pages	3
Permanent links block v0.1	Top of pages	4
Quick Search block v1.0	Top of pages	5
Carousel v1.1	Top of pages	6
Categories block v1.0	Left column blocks	1
Cart block v1.2	Left column blocks	2
Specials block v0.8	Right column blocks	1
Tags block v1.0	Right column blocks	2
Footer links block v0.1	Footer	1
Featured Products on the homepage v0.9	Homepage content	1

If you need to change the module position, go to *Modules* → *Positions*, click the *Transplant a module*, and select module, than new position. Make sure the module has only one position assigned.
